

# Mitchell Adams

---

## Education

**West Virginia University at Parkersburg**  
A.A.S., Computer Information Technology.

*May 2012*

**West Virginia University at Parkersburg**  
B.A.T., Software Engineering / Information Security Double Major.

*Expected 2015*

## Skills

**Operating Systems:** Windows 9x, 2000, XP, 7,8,2003,2008, Linux, Mac OS X, Cisco IOS, Android  
**Technology:** Cisco Router and Switch configuration, Repair and troubleshooting of peripheral devices.  
**Software:** Visual Studio, Eclipse, NetBeans, Access Data FTK, MySQL, Git Version Control  
**Languages:** C, C++, C#, Python, Java, HTML, CSS, PHP  
**Certifications:** Network+, Security+

## Experience

**Maintenance Associate - Wal-Mart**

*Feb 2008 -Feb 2014*

I was active in routine maintenance and preventive maintenance procedures to keep facility clean and safe for customers and associates and worked efficiently in a team or independently to complete tasks in a timely manner.

**Tutor – West Virginia University at Parkersburg**

*Aug 2012-May 2013*

Worked with the schedules of other students to provide one-on-one and group study sessions for areas of study related to computer science, information technology, and business technology.

**Tech Support – West Virginia University at Parkersburg**

*Aug 2013 -Present*

Tier 1 tech support to assist the IT department, tasks included answering phones, resetting passwords, performing routine updates and providing technical support to both faculty and students with hardware and software issues.

**Software Engineer (Intern) - nChannel**

*Feb 2014 -Sep 2014*

I developed code that interfaced with various e-commerce API to integrate items, orders, and customer data into nChannel. Through assigned tasks I gained firsthand knowledge of source control through TFS and Microsoft Visual Studio as well as the agile software development life-cycle. Participated in the documentation of new code via the developer wiki and took notes during demonstrations and meetings.

## Projects

**Noobtutor.com**

*Under Development*

An interactive Q&A site with a user experience focused on mobile web and devices. It uses python flask framework and MySQL backend for database. Hosting provided by [www.pythonanywhere.com](http://www.pythonanywhere.com). Currently in development.
